

## Safety Recreation Facility Operator Certifications

# Essential knowledge for keeping your facility safe

## Program Overview

Alberta Recreation Facility Personnel (AARFP) and Alberta Municipal Health and Safety Association (AMHSA) have partnered to offer four educational certification opportunities and technical skills related to the operation of recreation facilities. The four certification programs are: *Arena Safety Operator*, *Aquatics Safety Operator*, *Building Maintenance Safety Operator*, and *Parks and Sport Fields Safety Operator*.

## What are the benefits?

- Enhance your skills and knowledge as a safety operator.
- Assists in professional development plans for your staff.
- Establishes an educational standard in which recreation facility employers use as a basis for hiring.

## PANEL

### Arena Safety Operator

Students will learn a variety of tasks related to arena operations (making, marking, painting, and maintenance of artificial ice surfaces and refrigeration theory). AMHSA's core and elective courses will round out this training with a focus on health and safety and legislative requirements.

### Building Maintenance Safety Operator

Students will learn a variety of tasks to maintain and troubleshoot their facility components (HVAC, carpentry, electrical, plumbing, control systems, and are suppression systems). AMHSA's core and elective courses will round out this training with a focus on health and safety and legislative requirements.

### Aquatics Safety Operator

Students will learn a variety of tasks related to swimming pool operations (water circulation/filtration, basic chlorine and salt water chemistry, water balance, pool diseases and water testing). AMHSA's core and elective courses will round out this training with a focus on health and safety and legislative requirements.

### Parks and Sport Fields Safety Operator

Students will learn a variety of tasks related to maintenance of sport fields and parks (equipment, plant beds, soil tests, weed control, turf diseases, pruning, composting, irrigation, grass greens, tea boxes). AMHSA's core and elective courses will round out this training with a focus on health and safety and legislative requirements.
