

AMHSA Learning and Compliance Software

The smart way for OHS managers to streamline, modernize and customize knowledge.

Take your organization to the next level with OHS learning and compliance software that lets you organize, manage and deliver health and safety knowledge like never before. AMHSA's Learning and Compliance Software solution comes with a solid core of important tools, plus a selection of time-saving module options you can add on to suit your organization's specific needs.

The Core Components

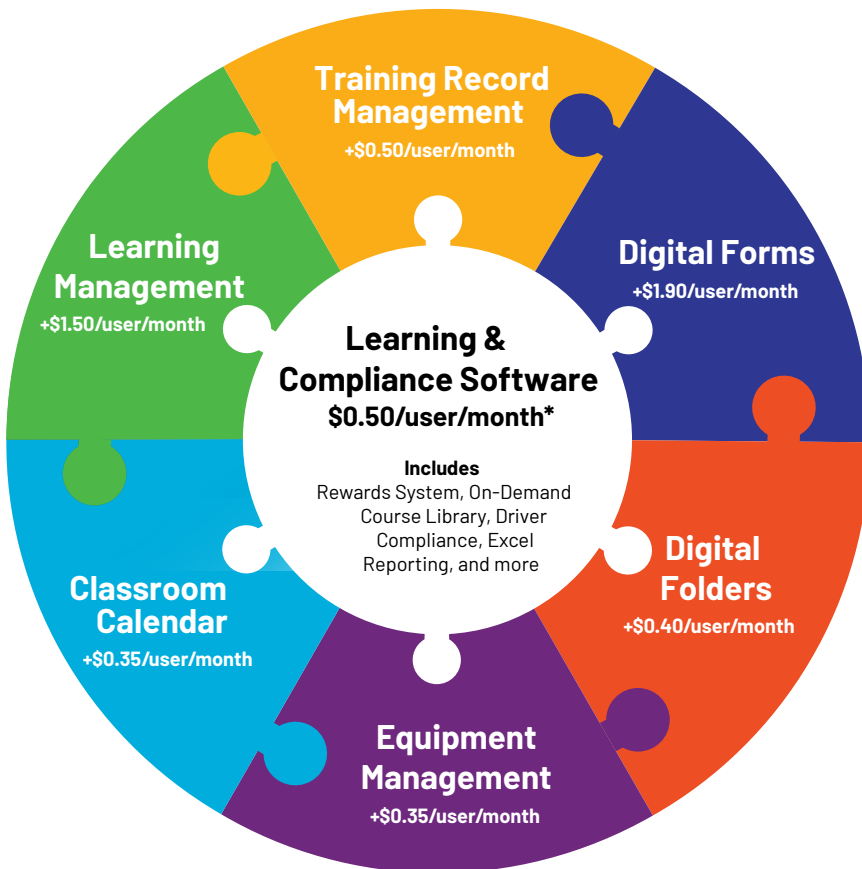

With AMHSA's Learning and Compliance Software base, you gain access to rewards, on-demand course library, driver compliance, Excel reporting, and more.

Solution Modules

Add onto your software base with these time-saving module options: Training Record Management, Digital Forms, Digital Folders, Equipment Management, Classroom Calendar, and Learning Management, each available for a small additional fee per month.

Build Your Learning and Compliance Solution

Start with the core, then add more.

AMHSA Learning and Compliance Software

Strengthen your learning and compliance strategy with these module options

Training Record Management

Allow your managers and employees to upload training records and certificates, regardless of training provider. Once uploaded and approved, the integrated training matrix can automatically assign courses, while the system sends alerts and delivers scheduled reports to help everyone ensure all training is up to date.

[LEARN MORE](#)

Digital Forms

Easily create online and off-line digital forms for hazard assessments, competency validations, onboarding documents, and more using check boxes, drop-down menus, Likert scales, text fields, and logic rules that can dynamically reveal fields based on answers provided, add training to user accounts, and more! When completing forms, respondents can upload images, videos, and files, and provide their signature.

[LEARN MORE](#)

Classroom Calendar

Manage classroom-based training with our powerful calendar tool that can manage enrollment, inventory, and equipment, as well as hundreds of instructors, classrooms, and courses across multiple locations.

[LEARN MORE](#)

Learning Management

SCORM compliance, virtual proctoring, in-course document uploads, digital form integration, competency management, and building, delivering, managing, and reporting on multi-level, multi-course certification programs are just a few of the capabilities of our learning management solution.

[LEARN MORE](#)

Digital Folders

Upload company policies, procedures, manuals, and more to a secure, cloud-based folder for easy online access. Next, grant folder access by employee, company role, and/or location. With the proper access, folder contents can be securely viewed and signed-off on by one, some, or all employees.

[LEARN MORE](#)

Equipment Management

Simplify preventative maintenance by centrally storing the location, status, hours of operation, and maintenance history of each unit. Then, combine it with digital forms to automate key tasks, including issuing inspections, maintenance tickets, repair and service requests, and more!

[LEARN MORE](#)
